The TRACE32 System includes a multitask debugger to provide symbolic debugging in real time operating systems. Our software package contains a ready-to-run configuration for the OSEK/VDX conform Real Time Kernel OSEK from Motorola.

Based on the ORTI (OSEK Runtime Interface) all informations of the OSEK RTOS and its configuration can be explored. This leaflet will guide you through the additional implemented features in TRACE32, to do an effective debugging on OSEK systems.

Multitask Debugging on TRACE32 with Motorola OSEK

Real time, non-intrusive display of Motorola OSEK system resources

The TRACE32 multitask debugger for OSEK provides special display functions. The system resources such as task list, messages, counters, alarms, stacks and resources can be displayed. In addition, by using the emula-

tors dual-port memory, the display of all these regions can be viewed non-intrusively in real time. The tables are updated permanently ("On The Fly"), without affecting the application at all.

The screenshot shows three windows from the TRACE32 debugger:

- E::task.dtask**: A table showing task details.

task	task priority	task state	current task stack
TASKSND	1	READY	NODE_STACK_1
TASKRCV	3	RUNNING	NODE_STACK_3
TASKPROD	2	WAITING	Pool1_STACK_0
TASKCONS	0	SUSPENDED	NO_STACK
- E::TASK.DMESSAGE**: A table showing message details.

message	message type	queue size	message state	notified task	event	alarm	alarm
MsgA	UNQUEUEDMESSAGE	1	MSGFREE	TASKRCV		MSGALARM	100
MsgB	QUEUEDMESSAGE	5	MSGFREE				
- E::TASK.DALARM**: A table showing alarm details.

alarm	alarm state	assigned counter	notified task	event to set	time to expire	cycle period
MSGALARM	ALARMRUN	SYSTEMTIMER	TASKSND		0x0064	0x0000
PRODALARM	ALARMRUN	SYSTEMTIMER	TASKPROD	TIMEVENT	0x0001	0x0003
EVMSGALARM	ALARMRUN	MSGCOUNTER	TASKCONS		0x0001	0x0000

Task list window, message window and alarm window

The screenshot shows the **E::TASK.DOS** window, which displays the configuration of the OSEK operating system:

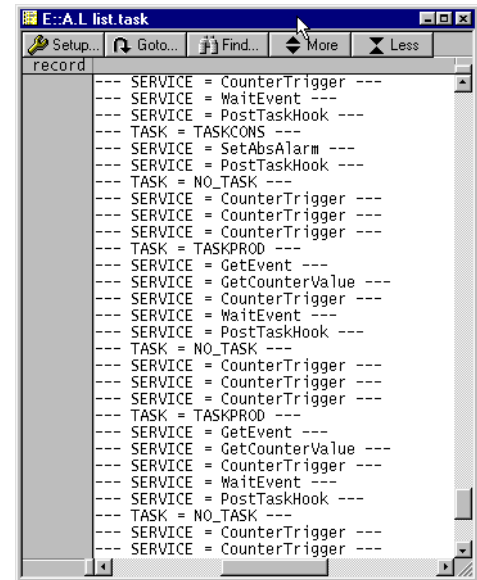

os	running	task identification	os services watch	executed isr identification
os1	TASKRCV		NO_SERVICE	TASK_LEVEL

Configuration of OSEK operating system window

Motorola OSEK specific display of analyzer listing

The data recorded in the analyzer can be displayed and interpreted specific to the operating system. Task switches are displayed symbolically

Analyzer listing, task selective recording, display of task switches and assembler mnemonics

Statistic evaluation and graphic display of task run times

The analyzer can calculate statistic tables of task run times and task switches. A graphical diagram shows which task was active at a specific time, giving a clear view of the behaviour of the system.

The screenshot shows a window titled "E::A.STAT.TASK" displaying a table of task statistics. The table has columns for range, time, avr, maxintr, count, ratio, 1%, 2%, 5%, 10%, 20%, 50%, and 100%. The total time is 36.986s.

Statistics and flow of tasks

Statistic evaluation and graphic display of service run times

The statistic and graphic evaluation of service calls and service run times can be done. This is necessary, if one ser-

vice need much time and is called very often the performance of the operating system goes down..

Task related evaluation of function run times

The statistic and graphic evaluation of function calls and function run times can be done dependant to the actual running task. This is necessary, if dif-

ferent tasks call one single function at the same time, or if a task switch occurs in between the function.

Task Stack Coverage

In real time systems it is quite important to know, how much stack space each task consumes. For this purpose

a special window shows the current and the maximum usage of each separate task.

Process stack coverage window

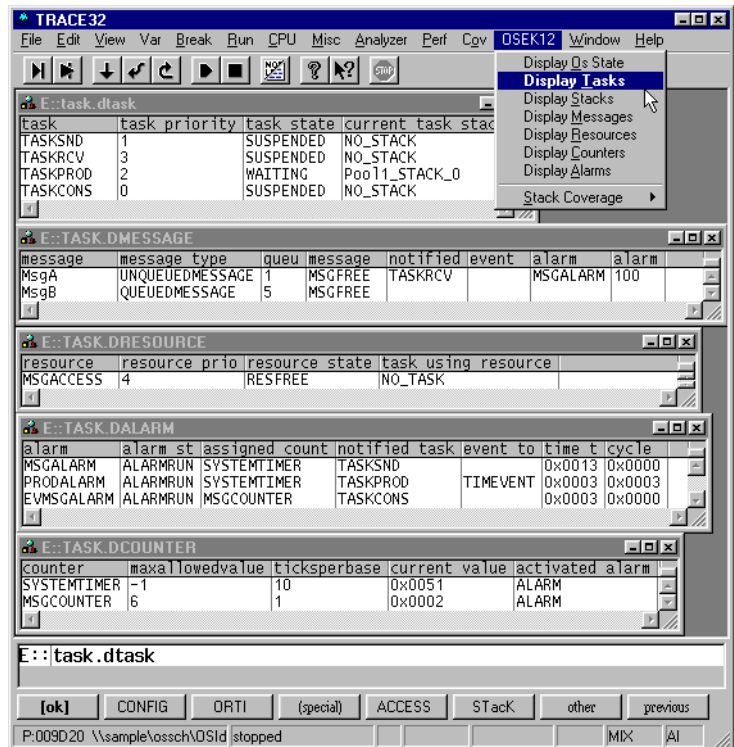

PRACTICE functions for OS data

The support includes extended PRACTICE functions for process specific data. E.g. the function "TASK.CONFIG(magic)" returns the address of the so called magic value.

Motorola OSEK related pull-down menu

Because the menu bar of the TRACE32 user interface can be fully customized, you can create a new pull down menu, including operating sys-

tem specific commands. We deliver OSEK support with an example for such specific menus, which provides fast access to the OSEK features.
